

PRESIDENT'S ADDRESS ON THE THIRD INTERNATIONAL RESEARCH PROGRAM OF IAEG

Dear IAEG community,

The IAEG is pleased to announce the start of the 3rd International Research Program of IAEG (IRP), with the theme “Engineering Geology and Sustainable Development”. We have very high expectations for IRP on the promotion in research and practice of Engineering Geology and the Environment, especially the deeper participation of IAEG commissions.

We are looking forward for innovative proposals and cross-regional cooperation focused on this specific research area. Please note that it is very important to highlight the engineering geological components within the proposals.

Yours Sincerely,

Vassilis P. Marinos
President of IAEG
